Man and Woman - Free your Potential

Awaken your creative power

Life arises from the masculine and feminine poles. We carry both within us, regardless of our gender. How do these primal forces work within you? Are they fully available to you in their individual power beyond ideas and clichés? Do the male and female poles in you cooperate? What is possible when they are a team? What wants to emerge in you and through you? When we begin to free and reconcile the masculine and feminine forces within us, we contribute to equality, balance and healing creativity in our lives, our immediate environment and for the earth.
